8 Projects (optional, for fun)

QUICK

n8n 3. A weekly garden report by email

Quick version

No time to read it all? This is the short version. The full guide is below.

- Every Sunday at 8 am, n8n emails you a short report: how many plants your website has, and the current soil moisture.
- Medium, 1 hour, free. Do n8n 1 first, with the garden and Home Assistant running.
- Make a Home Assistant long-lived token. Store it in n8n as a **Header Auth** credential (`Bearer`, then the token). Treat it like a password.
- The workflow: **Schedule Trigger** (Weeks, Sunday, 8:00), two **HTTP Request** boxes (the garden, then Home Assistant), then **Send Email**.
- Click **Execute workflow** once to test, then **Save** and switch it to **Active**.
- No email on Sunday? The workflow must be **Active**. Look in **Executions** for errors.
